

Character Code Table

- * Note that in addition to the [B] key operation described previously, you can also enter a space using the character code 0000.
- * Character code 1515 specifies that the following character is double width. It must be entered immediately before each double-width character. 1515 is also counted as a character, so each double-width character is counted as two normal-size characters (i.e., 1515 + applicable character code).

A	0110	a	0308	0	0100	â	0604	Ⓜ	1009
